

Leap Systems has a unique approach to managing personal finance. It offers your clients a full visual model of their financial position by incorporating everything from income and investments to insurance and taxes to help your clients manage their finances more efficiently. This distinct approach blends budgeting science and visual representations with a philosophy of protection, savings and growth that encourages your clients to achieve their full financial potential.

With Leap's interactive tools your clients learn how money works and how to recognize the impact of all their financial decisions by simulating financial strategies and viewing potential outcomes. By examining those outcomes your clients will begin to understand the factors that may be eroding their wealth. They can then use that knowledge to make informed choices that improve their financial lives.

On Leap's website, [new.leapsystems.com](http://new.leapsystems.com), you'll find what makes them different, their products, upcoming training, and basic "who they are" information. On the Home page, scroll down until you see the Financial Junk Drawer video (lady with red hair sitting at a desk), which is a great couple-minute synopsis of what Leap is about.
