

Introducing WinFlex 6.5 – Illustrations on-the-go!

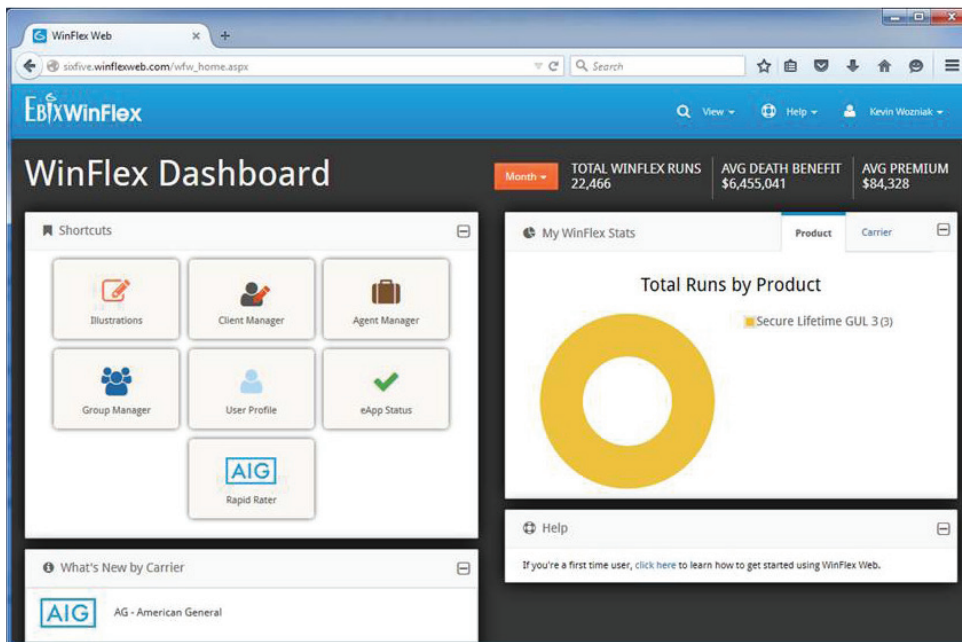

WinFlex is now available wherever you are! American General Life Insurance Company (AGL) and The United States Life Insurance Company in the City of New York (US Life) are the first major life insurance carriers to go live with the new WinFlex 6.5 platform which gives you the ability to run illustrations from a variety of browsers and platforms. This includes all major internet browsers and platforms such as iPad, Android, and Microsoft tablets.

WinFlex 6.5 features a portable, user-friendly interface and improved help functionality. You can also access all of your existing cases in WinFlex 6.5 using your current user ID and password. The WinFlex Dashboard is pictured below.

To access the new environment:

- Click this website: <https://sixfive.winflexweb.com/>
- Log in using your existing WinFlex Web user ID and password.
- If you have login issues, please click “Forgot Username” or “Forgot Password.” If you do not have a user ID and password, please click “Register for WinFlex.”

Since AGL and US Life are among the first major carriers to launch WinFlex 6.5, multi-carrier quoting will not be available at the outset. That functionality will be released in 2016.
